

CUSTOMER ANALYTICS

Analyzing customer behavior, product trends, and sales patterns

Siddhartha Baniya

INTRODUCTION

This project analyzes real sales and customer behavior data from Mala Pasal to uncover buyer segments, product performance, gender patterns, and payment trends. The goal is to demonstrate how data insights can guide marketing strategy, inventory planning, and business decisions.

OBJECTIVE

➤ Identify key customer segments

➤ Analyze top-selling product categories

➤ Understand payment and gender patterns

➤ Generate insights to support business decisions

DATASET OVERVIEW

S.N	Name	Gender	Occupation	Products Type	Product Name	Payment	Contact	Behaviour	Location
1		Male	Job	Bracelets	Tiger Eye	Online		Habitual Buyers	Lagankhel
2		Male	Student	Bracelets	Black Tiger	Cash		Complex Buyers	Bhurungkhel
3		Male	Unknown	Bracelets	7 Chakra	Cash		Dissonance Buyers	Samakhusi
4		Male	Unknown	Mala	Tiger Eye	Online		Habitual Buyers	Balaju
5		Male	Actor	Bracelets	Citrine and Tiger Eye	Cash		Complex Buyers	Thapathali
6		Female	Model	Bracelets	Rosewood	Online		Habitual Buyers	Kupandole
7		Female	Unknown	Mala	Amazonite	Cash		Habitual Buyers	Tinkune
8		Male	Job	Mala	Red Tiger	Cash		Dissonance Buyers	Uttardhoka
9		Female	Student	Bracelets	Mix Stone	Cash		Habitual Buyers	Baneswhwor
10		Female	Unknown	Bracelets	Turquoise	Cash		Complex Buyers	Maitidevi
11		Male	Student	Bracelets	Mix Stone	Online		Habitual Buyers	Hetauda

DATA CLEANING

➤ Removed duplicates

➤ Cleaned gender labels

➤ Created calculated fields

➤ Standardized product categories

➤ Ensured consistent payment method tags

BUYER BEHAVIOR SEGMENTS

Habitual Buyers make up the largest customer segment, showing strong repeat-purchase behavior.

Complex Buyers also represent a sizable portion and offer high potential for conversion through targeted education and product detail.

Male buyers make up a slightly larger share of the customer base, showing stronger engagement from men across product categories.

Female buyers still represent a significant portion, indicating that marketing strategies should continue to appeal to both groups.

Gender Distribution

■ Female
■ Male

 **GENDER
DISTRIBUTION**

SALES BY PRODUCT TYPE

Bracelets were the highest-selling category, indicating strong customer preference and higher demand compared to other products.

Mala sales were moderate, while combined Mala + Bracelet purchases were the smallest segment, suggesting limited cross-selling opportunities.

PAYMENT METHOD

Cash payments dominated overall transactions, showing that most customers still prefer in-person or instant payment methods.

Online payments accounted for a smaller share, indicating an opportunity to promote digital payment options for convenience and faster checkout.

KEY FINDINGS

- Strong habitual buyer base → retention strategy effective.
- Product concentration in bracelets → optimize inventory.
- Gender distribution balanced → dual-targeting strategy possible.
- Cash-heavy transactions → encourage online payments.

BUSINESS IMPACT

- Improved product stocking based on top categories
- Refined marketing campaigns by buyer segment
- Reduced CAC by focusing on high-ROI products
- Improved record keeping via digital payment push

THANK YOU
